Tammy Tagge 1:56 PM

You encouraged Anika Phillips to take a college class - she wrote this in Advisory this week... thought you'd appreciate it: "A time when something clicked for me was taking my first college class of equine science. I am an equestrian so I anticipated to not struggle to much in the class, but I did not expect that I would actually enjoy it. It is now my favorite subject and I enjoy doing work for it. This experience told me that when something gains my attention, I dedicate all my focus to it. I am a hard worker, but I just pick and choose what to work hard on. This is why I will try to expand my focus to other things."

Family and Community Engagement

Ideas to consider when presenting....

Student Site Council

- Several families are interested this year which is an improvement

Zach's [community, building and career exploration project](#) was a joy to watch.

Just wait for it..."During the day I build houses; at night I DJ!"

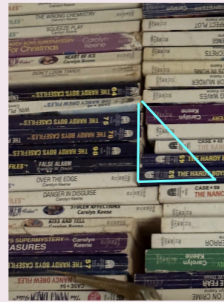

Twins [Charlotte](#) and [Lilly](#) A did a beautiful job finding right triangles in real life for Geometry honors! You can see so much of their interests in the items they found on their scavenger hunt AND it was a ton of fun to do and to see. Click the images or their names to see their slideshows.

Books

My nancy drew collection has right angles I found a right triangle in the gap where two stacked columns of my books meet. The vertical spine of one stack meets the horizontal shelf line at a right angle, and the diagonal line completes the triangle as the hypotenuse.

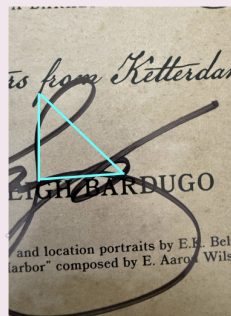

David Bowie :D

My favorite book about david bowie has this photo of him looking into a mirror. The bottom-left corner of the mirror frame forms a sharp 90° right angle. The blue red lines follow the edges of the frame to make the legs, and the diagonal line connects them to form the hypotenuse of the triangle.

Signature

I went to a book signing and the authors signature mmakes a right triangle out of the loop in her pen stroke. The vertical line down the letter connects at a right angle with the horizontal loop baseline, while the diagonal ink stroke forms the hypotenuse.

This is a picture from when I went in a glider. I was Kinda scared to actually steer, there where like Two steering ticks in there and an adult was Doing the steering most of the time. The right Triangle circled. I believe that's the switch to open The clear dome window(I THINK), and the wire is there to Prevent it from kids from switching it.

This is a little art project I did. Im very proud of it, it took me 3 hours to finish, I use this book to write down guitar tab and chords. The triangle is hidden in the design. I circled it but it's still pretty small.

AAA OKAY! This is one of my favourites!! I went to see Benson Boone on monday and it was absolutely AMAZINGG, I GOT BARRICADE AND TOUCHED HIM (HIGH FIVE)!! It was so freaking cool!! The triangle is in the A in wanted.

AND, we have to celebrate Anika Phillips, earned a championship title this past July at The Oaks. This is a special victory for Anika because she had a fall off of her horse this year and had to have surgery. She recovered quickly, finished all of her classes and now has taken home a championship 😊 So Proud of her! She complete the Equine Science CTE Pathway and completed an Animal Science course at Pierce college to meet her College & Career Indicators
